

REPORT DOCUMENTATION PAGE

Form Approved
OMB No. 0704-0188

Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204 Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188) Washington, DC 20503.

1. AGENCY USE ONLY (Leave blank)

2. REPORT DATE
28 March 1996

3. REPORT TYPE AND DATES COVERED
Final Report, 1-Sept-91 to 28-Feb-95

4. TITLE AND SUBTITLE

Simulation Network

5. FUNDING NUMBERS

DAAL-03-91-G-0319

6. AUTHOR(S)

Peter W. Glynn
Donald L. Iglehart

7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES)

Department of Operations Research
Stanford University
Stanford, CA 94305-4022

8. PERFORMING ORGANIZATION
REPORT NUMBER

9. SPONSORING / MONITORING AGENCY NAME(S) AND ADDRESS(ES)

U.S. Army Research Office
P.O. Box 12211
Research Triangle Park, NC 27709-2211

10. SPONSORING / MONITORING
AGENCY REPORT NUMBER

ARO 29412.3 -MA-SDT

11. SUPPLEMENTARY NOTES

The views, opinions and/or findings contained in this report are those of the author(s) and should not be construed as an official Department of the Army position, policy, or decision, unless so designated by other documentation.

12a. DISTRIBUTION / AVAILABILITY STATEMENT

Approved for public release; distribution unlimited.

12b. DISTRIBUTION CODE

13. ABSTRACT (Maximum 200 words)

This report briefly describes the activities of a simulation network that was funded by the Army Research office during the period 1991-1995.

19960522 099

14. SUBJECT TERMS

simulation, network, World Wide Web

15. NUMBER OF PAGES

5

16. PRICE CODE

17. SECURITY CLASSIFICATION
OF REPORT

FINAL REPORT

**PETER W. GLYNN
DONALD L. IGLEHART**

MARCH 28, 1996

U.S. ARMY RESEARCH OFFICE

GRANT # DAAL-03-91-G-0319

**STANFORD UNIVERSITY
DEPARTMENT OF OPERATIONS RESEARCH**

APPROVED FOR PUBLIC RELEASE; DISTRIBUTION UNLIMITED

The view, opinions, and/or findings contained in this report are those of the authors and should not be construed as an official Department of the Army position, policy, or decision, unless so designated by other documentation.

FINAL TECHNICAL REPORT

1. **ARO Proposal Number:**
29412-MA-SDI
2. **Period Covered by Report:**
1 September 1991 - 28 February 1995
3. **Title of Proposal:**
Simulation Network
4. **Contract or Grant Number:**
DAAL-03-91-G-0319
5. **Name of Institution:**
Stanford University
6. **Author of Report:**
Peter W. Glynn
7. **List of Manuscripts Submitted or Published Under ARO Sponsorship During this Reporting Period, Including Journal References:**
See attached page.
8. **Scientific Personnel Supported by this Project and Degrees Awarded During this Reporting Period:**

Personnel Supported:
Peter W. Glynn, Associate Professor and Co-Principal Investigator

Students:

Shane Henderson	01/01/94 - 12/31/94
Sandeep Kumar Juneja	01/01 - 03/31/92, 01/01/93 - 08/31/93
Tava Maryanne Lennon	07/01/92 - 08/31/92
Erika Schraner	06/01/92 - 08/31/92
Marcelo Torres	10/01/92 - 06/30/93
Eugene Wong	05/01 - 08/31/92, 10/01 - 12/31/93, 03/28 - 06/8/94
	9/26 - 12/31/94 and 01/01/95 - 2/28/95
Tzu-Hui Yang	04/01 - 06/30/92, 06/16 - 08/31/93, 09/16 - 03/31/94, and 01/01/94 - 12/31/94

Degrees Awarded:

 - Diane Erdmann, Ph.D. (Operations Research)
 - Sandeep Juneja, Ph.D. (Operations Research)-actual conferral date 3/31/94
 - Craig Kollman, Ph.D. (Statistics)
 - Tava Maryanne Lennon, Ph.D. (Operations Research)
 - Tzu-Hui Yang, Ph.D. (Operations Research)
9. **None**

Peter W. Glynn
Operations Research
Stanford University
Stanford, CA 94305-4022

MAJOR ACCOMPLISHMENTS

SNET is a simulation network, centered at the Department of Operations Research at Stanford University, that is intended to act as a forum for the discrete-event stochastic simulation community. The network moderator sends out regular newsletters on matters of common interest to all network subscribers. Over the course of this contract, the network moderators were Tzu-Hui Yang and Shane Henderson. Other students acted to maintain the system and/or add new utilities to SNET.

The network currently serves over 300 subscribers. These subscribers used the mailing facility over 350 times and the paper library over 120 times. In addition, the network:

- (1) provides a capability for SNET to act as an electronic "go-between" that allows subscribers to send email messages to other subscribers without explicit knowledge of the intended recipient's email address;
- (2) collects electronic versions of papers and/or abstracts both from individuals and the following journals:
 - Advances in Applied Probability
 - Journal of Applied Probability
 - Management Science
 - Probability in the Engineering and Informational Sciences
 - The Annals of Applied Probability
 - The Annals of Probability
 - The Annals of Statistics
 - ACM Transactions on Modeling and Computer Simulations
 - Queueing Systems
- (3) some software is also available through a network library.

We are currently exploring various ways in which network resources can potentially be made available through the World-wide Web. This would open access to a much broader user base than is currently possible.

Recently, Shane Henderson opened an SNET page on the world-wide web; the address is:

<http://www-or.stanford.edu/~snet/>

This opens access to a much broader user base than was previously possible.
